## בריכות פיברגלאס משופצות

Older polyester swimming pools can experience vessel watertightness issues as cracks may appear. These cracks normally don't pose problems to the swimming pool's structure itself, but watertightness can be an issue.

Additionally, some clients may prefer to renovate their swimming pool with a mosaic finish, given that it is more attractive and durable.

### Signapool offers two systems for polyester swimming pools:

1. The first involves repairing a swimming pool in which cracks are posing a problem. The Signapool system manages to secure the structure using the Signapool sheet, which then provides the base for a mosaic finish on top.
2. The second involves renovating polyester swimming pools with a mosaic finish. This involves using white EpogROUT epoxy to install the mosaic. Other colors may be supplied on special order.

### Advantages:

- » Easy to install
- » Can withstand movements and bridges cracks
- » It separates the mosaic from the structure
- » Minimum thickness system
- » Dual watertightness with the grout, EpogROUT
